### What's New in the?

Email Monitor will monitor all POP3 mailboxes for new messages and new replies. Each message or reply will be displayed in its own Message List, allowing you to identify the message without having to open the Messages window. Features: - Automatically monitor an unlimited number of POP3 servers, including autodiscover. - Detect new Emails on your server and add them to the window. - Keep track of the Subject and Date/Time of any message or reply on the server. - Easy identification of messages that are relevant to you. - Make email lists, containing messages to and from a specific address. - Create or edit Rules to mark certain messages as junk or spam. - Help you avoid opening your main Email Client, such as Microsoft Outlook or Outlook Express. - Filter the messages into a list of messages marked as important. Bought it and had to read the description to find out how to use it because it looks to be more than what the name implies. When I finally got to figuring out how to use it it detected all my email accounts and did a check with all of them except for one. It is a free trial so I can't really review it. I will say that it looks better than I expected and the instructions are quite clear so I would recommend it to anyone who's looking for a simple, easy to use, general purpose email notifier. Email Star is an innovative piece of software which is designed to help individuals and businesses to stay in contact with their loved ones and friends. This program is easy to install and configure.
